

Kitchener, Ontario, Canada – January 30, 2009

Canadians are committed to BiblioChip

**Customer-centered modernization
with RFID**

Since 2008 the Brampton Public Library in Ontario, Canada, has selected Bibliotheca RFID Library Systems as their RFID supplier. The Brampton Library is comprised of four branches and two interim sites that house a vast collection of more than 562,000 items.

The Public Library opened its doors in 1887. Today, Brampton Library provides exceptional access to highly valued services through a full complement of contemporary facilities. Arthur Sykes, Manager of Library Systems for Brampton Library stated: "It became obvious during our site visits that the BiblioChip RFID Library System was superior. Bibliotheca's system helps improve productivity and assist the Library in meeting customer expectations for the present and foreseeable future."
